Non-GAAP Financial Measure and Related Information

This presentation includes EBITDA, Adjusted EBITDA, Pro Forma EBITDA, Pro Forma Adjusted EBITDA, and Adjusted Revenue – each of which is a financial measure that is not prepared in accordance with U.S. generally accepted accounting principles ("GAAP"). SourceHOV and Novitex believe that these non-GAAP measures of financial results provide useful information to management and investors regarding certain financial and business trends relating to SourceHOV's and Novitex's financial condition and results of operations. SourceHOV and Novitex do not consider these non-GAAP measures in isolation or as an alternative to liquidity or financial measures determined in accordance with GAAP. A limitation of these non-GAAP financial measures is that they exclude significant expenses and income that are required by GAAP to be recorded in SourceHOV's and Novitex's financial statements. In addition, they are subject to inherent limitations as they reflect the exercise of judgments by management about which expenses and income are excluded or included in determining these non-GAAP financial measures and therefore the basis of presentation for these measures may not be comparable to similarly-titled measures used by other companies. These non-GAAP measures should not be considered in isolation of, or as an alternative to, GAAP financial measures. In addition, certain of the financial information of the target companies contained herein is unaudited and does not conform to SEC Regulation S-X and as a result such information may be presented differently in future filings by Quinpario with the SEC. You should review SourceHOV's and Novitex's audited financial statements, which will be presented in Quinpario's proxy statement filed with the SEC and to be delivered to Quinpario's stockholders, and not rely on any single financial measure to evaluate SourceHOV's and Novitex's businesses. For reconciliation of the comparable GAAP measures to these non-GAAP financial measures, see the Appendix to this presentation.

Novitex Historical Financials

Commentary

- The core business for Novitex is stable with flat revenues
- Novitex has experienced significant headwinds in the Federal business and today the segment represents less than 7% of revenues. Novitex lost several lower margin Federal accounts due to a change in application of existing regulations relating to their suppliers, but were able to maintain many higher margin accounts
- In '14 and '15, Novitex was additionally impacted negatively by CAD FX rates
- Changes in business mix have begun to improve margins as off-site activities are at higher incremental variable margins and the fixed operating base is covered by existing customers
- Recently developed mega-centers additionally drive higher margin performance
